**Subject:** Assessment of Harriet Fabricant

Dear Mirjana,

Thank you for your hands on approach and patience. I very much appreciate the arrangements you made for nurse Judy Duclona to come and reassess my mother, Harriet Fabricant, and determine what her present needs are and how to best meet them. She was very patient and thorough. I also appreciated her understanding in regard to my desire to participate in the assessment and offer recommendations. I am very confident that working with all the many compassionate and competent professionals at Premier Care Nurses of America we will soon put in place all that is needed to keep my mother safe and to provide her with the comfort needed for quality of life.

Dear Judy,

Thank you for your time and patience as you reassessed, my mother, Harriet Fabricant's present condition. I appreciate your willingness to respect my desire to participate. I was impressed with your thoroughness in assessing both my mother's physical, emotional and mental state as well as her environment. Your assessment and recommendations will be a very valuable tool to help insure her safety and comfort.

When you are able I would appreciate information in how a Care Manager would contribute to my mother's care. I would need to know their responsibilities, time needed per day/week and the rate for their services. I look forward to including that information as part as a report I am preparing for Ms, Fabricant's other children for clearer picture of my mother's needs and how to be most cost effective in supplying them.

Dear Michelle,
